STATISTICS

Report of the Conference Statistician

Ransom E. Casey-Rutland

For the year ending December 31, 2003

Many hands across the Florida Conference had a part in making this report possible. Someone in every congregation compiled the statistical information for their church and entered it into our electronic, online statistical program. Someone in every district office carefully reviewed each church's information and a variety of people at the Conference level checked the information again. I am very appreciative to everyone who worked to make this report possible and to ensure that this information is accurate.

In order to conserve space and to provide more detailed information this year we have made several changes. We have changed the column titles in each table. Instead of using phrases as the title in each column to explain its contents, this year we use only one or two digits or letters as the column title. In most cases these digits and letters refer to the numbering system used in the statistical collection forms. The key that defines these column titles in Table 1 and Table 2 immediately precedes Table 1.

We also have changed the way we present clergy compensation information. The clergy compensation detail is presented in a separate chart instead of being included as part of Table 2, as has been done in the past. This change saves space and also enables us to provide more information on clergy compensation. The clergy compensation chart, which is found following Table 2, contains detailed clergy compensation information as reported. The sum total of the clergy compensation information detailed in the chart is included in Table 2 as a single figure.

Following this introduction, statistical information for the Florida Annual Conference for the year ending December 31, 2003 can be found in the following order: key to understanding column headings for both tables, Table 1 data, summary of Table 1, Table 2 data, Summary of Table 2, clergy compensation chart.

There are some 35,000 congregations in the United Methodist Church and 730 of them are in the Florida Conference. The mission and ministry of the church can not be fully reflected through the compilation of statistics. Nevertheless, these numbers shed light on matters warranting concern and calling for celebration. This information guides decisions at the district, conference, and general church levels and thus helps keep our connection vital. I hope that you find this information helpful in your ministry.

Statistical Tables by District

Key to Column Headings in Statistical Tables: In order to conserve space in the statistical tables we have reduced the column headings in the tables from a phrase to just a few numbers or letters. These smaller column headings enable us to share more information, slightly larger type, and improve legibility. Please use the following chart as reference. In most cases the column numbers used here are the same as the column numbers used in the official statistical collection worksheets. Paragraph numbers, such as (§229.4), refer to the paragraph in the 2000 Discipline. District abbreviations are as follows: BP - Broward Palm Beach; DL - DeLand; FM - Fort Myers; GN - Gainesville; JA - Jacksonville; LA - Lakeland; LE - Leesburg; ME - Melbourne; MI - Miami; OR - Orlando; SP - St. Petersburg; SR - Sarasota; TL - Tallahassee; TM - Tampa.

Key to Column Headings in Statistical Tables: In order to conserve space in the statistical tables we have reduced the column headings in the tables from a phrase to just a few numbers or letters. These smaller column headings enable us to share more information, slightly larger type, and improve legibility. Please use the following chart as reference. In most cases the column numbers used here are the same as the column numbers used in the official statistical collection worksheets. Paragraph numbers, such as ¶229.4, refer to the paragraph in the 2000 Discipline.
